

Sergio Andrés Larios Fajardo

Carnet 202111849

Laboratorio de Introducción a la Programación y Computación

Examen Final

Problema 1

The screenshot displays the Apache NetBeans IDE interface. The main editor window shows a Java file named `ExamenFinalPC1.java` with the following code:

```
1 package examenfinalpc1;
2
3 import java.util.Scanner;
4
5 public class ExamenFinalPC1 {
6
7     public static void main(String[] args) {
8         Scanner sc = new Scanner(System.in);
9         System.out.print("Ingrese el primer numero \n");
10        int a = sc.nextInt();
11
12        System.out.print("Ingrese el segundo numero \n");
13        int b = sc.nextInt();
14
15        if(a>b){
16            System.out.print("El primer numero es mayor \n");
17        } else {
18            System.out.print("El segundo numero es mayor \n");
19        }
20    }
21 }
```

The left sidebar shows the project structure with `ExamenFinalPC1` as the main project. The bottom output window shows the execution results:

```
run:
Ingrese el primer numero
465
Ingrese el segundo numero
534
El segundo numero es mayor
BUILD SUCCESSFUL (total time: 3 seconds)
```

The status bar at the bottom indicates the current time is 21:12 and the date is 3/11/2022.

Problema 2
